

# VAJACIAL GLYCOPEEL

## WHAT IS IT?

New generation peel that combines Glycolic Acid with encapsulated AHA's to gradually release the active ingredients for optimal penetration and effect the skin. The skin refining exfoliation reduces the thickness of the stratum corneum improving skin texture, reducing the appearance of wrinkles and brightening the skin.

## ACTIONS

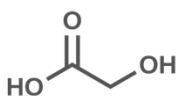

- 1 State of the art exfoliant that combines glycolic acid with AHAs for a deep exfoliating and renewal effect.
- 2 Opens microchannels between corneocytes, thereby increasing penetration of the active ingredients

## ACTIVE INGREDIENTS

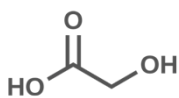

### GLYCOLIC, LACTIC AND CITRIC ACID

Powerful brightening effect and prevents further melanin production through inhibiting tyrosinase

### GLYPURE

Maximum purity glycolic with small molecular size.  
Promotes cellular turnover

### CYCLOSYSTEM COMPLEX

Encapsulated Glycolic Acid with a slow release time and low molecular weight that penetrates the deepest layers of the skin
