

DNA

DNA REJUVENATING SERUM

WHAT IS IT?

A face and body serum formulated with anti-ageing actives to repair and protect the skin. It's lightweight texture and molecular weight has been especially formulated to optimize absorption into the deepest layers of the skin.

ACTIONS

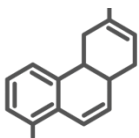

- 1 Use before and after Waxceutical DNA Wax, to take advantage of pore dilation and increased blood flow. The serum's active ingredients easily absorb through the micro channels for an immediate plumping and moisturizing effect.
- 2 The 3 ingredients work synergistically to increase tissue vitality, deeply hydrate and improve wrinkle depth and elasticity.

ACTIVE INGREDIENTS

MARINE DNA FILAMENTS

Visibly improves the signs of ageing by revitalizing, protecting and encouraging skin repair.

Q10 COENZYME

A powerful antioxidant which works to protect cell DNA, preventing skin ageing.

NATURAL MOISTURIZING FACTORS (NMF)

Strengthens our skins natural defenses by reinforcing the skin barrier and maintaining adequate skin hydration.
