

27.12 MHZ RADIO FREQUENCY ANTI-AGING TECHNOLOGY

With age comes wisdom...
but also sagging skin, wrinkles
and loss of tonicity. Many skin
imperfections that come with aging
are due to the depletion of elastin
and collagen in the dermis.
With its 27.12 MHz high-speed
radiofrequency, Axis anti-aging facial
treatments effectively stimulate
cells that produce collagen
and elastin so that your skin regains
all its splendor.

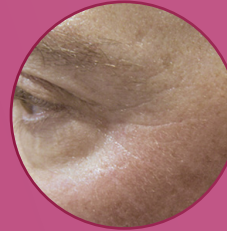

AFTER ONLY A FEW TREATMENTS,
THE SKIN IS MORE RADIANT, ITS TEXTURE
IMPROVED, WRINKLES ARE REDUCED
AND THE AREAS WITHOUT TONICITY
ARE FIRMER.

BEFORE

AFTER

TONE AND SMOOTH THE SKIN
REDUCE WRINKLES
IMPROVE RADIANCE
MINIMIZE DILATED PORES
REDUCE SCARS

27.12 MHZ RADIO FREQUENCY
ANTI-AGING TECHNOLOGY

WHAT IS RADIOFREQUENCY?

It is the emission of electromagnetic waves that have the ability to penetrate the skin and increase the movement of ions inside it. This phenomenon causes an endothermic effect that raises the temperature inside the tissues. The internal heat then activates the energy potential of each cell, allowing for an improvement of the skin quality.

SHORT AND LONG-TERM RESULTS

Exposure to the 27.12 MHz frequency triggers various processes in the skin. There is an increase in the supply of oxygen and nutrients to the cells, which leads to the acceleration of the cell metabolism and promotes the elimination of stagnant fluids. Wrinkles and fine lines are also visibly reduced.

The effects of the 27.12 MHz radiofrequency are also measured in the longer term. Indeed, electromagnetic waves have an influence on the connective tissue which results in skin firmness. The production of collagen and elastin fibres is naturally reactivated and, gradually, their quantity and diameter increase, restoring tone to the skin.

OUTSTANDING ANTI-AGING TREATMENTS

Axis stands out with its radiofrequency emitting electromagnetic waves at 27 million cycles per second. Such exceptional speed, it generates the required energy in less time than other devices in its category for faster visible results.

The Axis device also has the particularity to emit pulsed waves. With its unique Synchro mode, the passage of the current is interspersed with periods of thermal relaxation adjusted to the degree of sensitivity of your skin. The diffusion of heat into the tissues is thus optimized and the treatment is both more efficient and more comfortable.

FACIAL TREATMENTS ADAPTED FOR YOU

Firming

This treatment is particularly suitable for skins lacking tone. The skin of the face and neck is visibly firmer and the contour of the face more defined.

Anti-Wrinkle

This treatment is ideal for mature skins. It significantly reduces wrinkles and fine lines on the entire face and neck. The skin appears smoother and younger.

Radiance/Sensible

For sensitive skins, young or devitalized, the Radiance/Sensible treatment is sensational. It improves the radiance of the complexion while revitalizing the skin. The skin is fresher and the complexion is brighter.

Scars/Ostia

This treatment is the solution for skins with imperfections. It reduces the appearance of scars and ostia (pores) for a more even-looking skin.

Customized

This mode allows customization of the treatment according to the specific needs of each client. The area, parameters and type of handpiece are determined by your technician and adapted for you.

COMFORT FOR ALL

With its built-in temperature sensor, Axis gives your technician the ability to set a maximum temperature and thus control heat intensity at any time. Your sensitivity is therefore always respected to ensure your safety and comfort. A specific treatment has also been specially designed for sensitive skin.
