## DNA CRYSTAL FILM WAX

WAXCEUTICAL®

## WHAT IS IT?

This crystal (non-rosin) film wax provides an innovative protocol, combining the power of a skin rejuvenation treatment while simultaneously removing the hair. This wax changes colour to indicate when it is ready to remove!

## ACTIONS

- 1 Infused with anti-ageing ingredients, this wax has an osmotic effect on the skin, opening the pores and increasing blood flow to enhance penetration of active ingredients.
- 2 This patented wax formula will change colour from a translucent purple to lavender, notifying the therapist when the wax is dry and ready to remove. Painlessly removes the hair without pulling on the skin.

## ACTIVE INGREDIENTS

## ROSIN FREE

Well tolerated by skins which react to rosin.

## DNA FILAMENTS

Visibly improves the signs of ageing by revitalizing, protecting and encouraging skin repair.

## NATURAL MOISTURIZING FACTORS (NMF)

Strengthens our skins natural defenses by reinforcing the skin barrier and maintaining adequate skin hydration.
