# DNA THERMO MASK

WAXCEUTICAL®

## WHAT IS IT?

An occlusive thermal mask with added moisturizing agents and mica, offering deep hydration to boost the skin's radiance. The occlusive effect encourages penetration of active ingredients for visible and lasting changes to the skin.

## ACTIONS

- 1 The creamy texture allows for excellent adhesion to the skin only, avoiding the hairs and can be applied in multiple layers for a buildable wax mask.
- 2 The thermal activation results in an osmotic effect, opening the pores and increasing blood flow to enhance absorption of the anti-ageing ingredients.

## ACTIVE INGREDIENTS

### BIO-BASED RESIN

With a certified biological origin, this ingredient has a low molecular weight, is compatible with the skin and kind to the environment.

### MINERAL MOISTURIZING AGENTS

Has emollient properties to nourish and provide a moisturizing barrier.

### NATURAL MOISTURIZING FACTORS (NMF)

Strengthens our skin's natural defenses by reinforcing the skin barrier and maintaining adequate skin hydration.
