

WHAT IS IT?

A traditional wax formulated with Karite Butter to combat excessively dry, thickened and scaly skins which are more prone to eczema and psoriasis. Perfect to use in colder climates and winter months.

KEY FEATURES

- **SUPERIOR GRIP TO THE HAIR**
The Bio-Based Resin allows for excellent adhesion to the hair to remove even the most stubborn hairs.
- **SKIN PROTECTIVE PROPERTIES**
The perfect wax to use on compromised and excessively dry, scaly skin as the wax forms a protective shield between the hair and skin for a gentle removal.
- **RECOMMENDED FOR ALL HAIR TYPES**
From short and stubby too long and soft, it's effective on all!
- **LOW MELTING POINT**
Allowing for comfortable application without thermal sensation.

ACTIVE INGREDIENTS

BIO-BASED RESIN

This wax is made of natural and organic raw materials such as pine rosin and resin derived from soy glycerin. Compatible with the skin and kind to the environment.

KARITE BUTTER

Powerful emollient properties to soften and moisturize the skin

TITANIUM DIOXIDE

Has anti-inflammatory properties while forming a protective barrier between the hair and skin. Gives the wax a creamy and rich texture.
