

WHAT IS IT?

A film wax which purifies and deep cleanses the pores while effectively removing the hair. Ideal for male epilation where the hair is more dense and areas may perspire more. Available 1kg beads.

KEY FEATURES

- PURIFYING PROPERTIES**
Deeply penetrates hair follicles to purify and remove any toxins or debris trapped beneath the skins surface.
- LOW CONTACT TEMPERATURE & QUICK DRYING**
This wax dries quickly upon contact to minimise thermal sensation on the skin.
- RECOMMENDED FOR MALE EPILATION**
Effectively removes dense hairs and purifies follicles where perspiration often leaves a build up of toxins.
- GOOD ELASTICITY**
The unique composition allows for good elasticity for the wax to adapt and adhere easily to contours of the body.

ACTIVE INGREDIENTS

BIO-BASED RESIN

This wax is made of natural and organic raw materials such as pine rosin and resin derived from soy glycerin. Compatible with the skin and kind to the environment.

CHARCOAL POWDER

Effectively draws impurities and toxins from the hair follicles, for deeply cleansed skin.
